

29 September 2015

To whom it may concern,

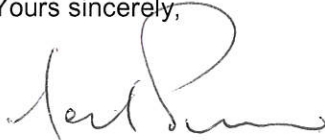

Go Energy Pty. Ltd. is a clean technology energy provider and energy retailer with a primary focus on renewable energy solutions through installation of commercial solar plants. Go Energy uses the services of specialist solar design and installation companies to implement its growing portfolio.

Go Energy has formed a business relationship with Rod Marshall of Easily Green for PV solar system design and project management services, including management of commercial installations, primarily for sites over 30kW that typically involve added complexity inherent in the size of the solution and in the additional requirements imposed by various authorities. Easily Green and their preferred installers Impressive Electrical recently completed a 50kW solution at Club Rose Bay RSL, are nearing completion of a 100kW solution at Stonecutters Ridge Golf Club, and have been requested to commence design on some 350kW of other business in NSW for Go Energy, to be installed over the next 4 months.

I am personally involved in the decision making process for taking on partner businesses. I am impressed with Rod's professional attitude, knowledge of building development and practices, and project management skills, and the diligence of the team at Easily Green in solar design and project delivery.

We invest the effort in identifying competent and trustworthy business alliances that can form the basis of long-term working relationships, and I endorse Easily Green and Impressive Electrical.

Yours sincerely,

Neil Purser
Chief Operating Officer
GoEnergy Pty. Ltd.
