Easily Green

Dear Sir

Re: Retrofit of Lighting, Chubb, Ashfield

Chubb Fire and Security engaged Easily Green in late 2012 to complete the retrofit of our existing office lighting to maximize energy savings across the site.

This was quite a large project and covered four office buildings on the one campus.

The process for us was made extremely easy given their intimate knowledge and understanding of the entire NSW Energy Saving Scheme and what is required for compliance.

Our dealings with the company was smooth and seamless right from the quoting process through the complicated path of compliance paperwork to implementation and wrap-up.

The team they had implementing the retro fit were impressive and they worked well with our Facilities team to ensure minimal disruption to staff on the day.

The project was delivered within the agreed time frame and budget with minimal defects.

Special mention should be made of key contacts Lyndal Scrivener and Rod Marshall for their assistance with paperwork and implementation. You made everything seem so easy.

Colin Murray
Manager – Special Operations
