

TO WHOM IT MAY CONCERN

Over the past year Rod Marshall from Easily Green has overseen two important electrical installations in the common areas of our 36 lot strata building, comprising 29 residential units and 7 commercial lots.

March 2015, a large 20kW solar panel array was installed on the outdoor carpark roof area. Rod and his team spent many hours measuring and refining, and the installation was completed in 2 working days. Disruption to residents was negligible, and all work was carried out professionally. Visual impact of this large installation is low, and ROI is expected to be less than 7 years.

March 2014, all outdoor twin-tube fluorescent battens were replaced with single tube T5 fittings, and all indoor circular fluorescent fittings were replaced with lower power LED fittings. Installation was done with a minimum of disruption to residents, with low visual impact. The installers' work was conducted in a very professional manner and the quality of the installation is excellent. ROI was achieved in a very short time.

I have no hesitation in recommending Rod Marshall, Easily Green, and their associate contractors. They are easy to deal with and very professional in their manner.

David Glasser,
Chairman, SP69357 Owners' Corporation.
